AERO-LIFE SIGNS AGREEMENT WITH HAWAII DISTRIBUTOR

--Aqua-Solutions to market, install and service aero-life aeration systems throughout Hawaii--

ALBUQUERQUE, N.M., April 5, 2004 – aero-life aeration systems, a provider of environmentally friendly wastewater treatment systems for restaurants and food service operations, announced today that it has signed an agreement with Aqua-Solutions, LLC, a specialty company providing wastewater solutions at the point of generation in Honolulu. aero-life currently has systems installed in more than 40 restaurants and food service operations in New Mexico, and is in the process of building a team of distributors to market, install and service its systems nationally. The agreement with Aqua-Solutions represents the company's first distributorship outside New Mexico.

The aero-life aeration system is a proprietary application of natural aeration that converts food service grease traps into mini wastewater treatment plants by creating a healthy, oxygen-rich environment in which kitchen wastewater can be cleaned and clarified without the use of chemicals. The system is also very cost effective, enabling restaurants and food service operations to reduce their operational costs by as much as \$10,000 per year using the system.

"aero-life aeration systems are a truly unique solution for helping restaurants and institutions responsibly handle wastewater treatment," says Buddy Reed, Aqua-Solutions president. "Our extensive knowledge and contacts in both the professional asset management and municipal waste industries make this a very powerful partnership for our existing and future customers."

--more--

As part of the agreement, Aqua-Solutions has exclusive rights to market, install and service aero-life systems throughout the Hawaiian Islands. The company has already installed one system at Rehab Hospital of the Pacific in Honolulu.

"We are seeing a very positive response to our system locally and expect that its cost-effective, environmentally responsible solution will have similar appeal to food service operators nationwide," says Dean Keller, aero-life president. "Our relationship with Aqua-Solutions is an ideal first step toward getting the word out about this unique technological advance."

About aero-life aeration systems

Aero-life aeration systems (www.aero-life.com) represents a new, environmentally friendly advance in wastewater treatment using natural aeration, a proven technology that can help restaurants and food service operations significantly reduce their operational costs. The company's proprietary application also benefits communities by reducing waste at the point of generation.
